Response to Restriction Requirement

Sir:

The present response replies to the Restriction Requirement mailed July 3, 2006. That requirement required restriction to one of three inventions categorized in groups as follows:

Group I. Claims 1-8, drawn to a prefix search key apparatus wherein the number of memory banks is determined by at least the number of ordinates within an n-dimension representation, the n-dimension representation defining a coordinate system, each bank associated with one of the ordinates within the n-dimension representation and converting the

Appl. No. «Case__AppSerialNumber»

Reply to Office Action of «OA__DateMailed»

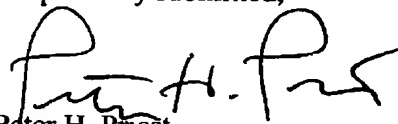

masked key into an n-dimension representation having a plurality of ordinates, classified in class 711, subclasses 5 and 104.

Group II. Claims 9-16, drawn to a prefix search key system wherein a result index multiplexer receives one or more match results and the priority signal, the resulting index multiplexer selecting the match result to output based on the priority signal classified in class 711, subclass 104.

Group III. Claims 17-24, drawn to a method of determining the longest prefix key match in a database wherein the masked key is converted to an n-dimension representation classified in class 711, subclass 104.

Applicants elect with traverse the Group I claims 1-8.

Respectfully submitted,

Peter H. Priest
